

Phoenix inverters 250 - 500VA

- Very high start-up power
- LED diagnostics
- VE.Direct port for Connect App or CCGX
- Power Saving mode operation
- Proven full bridge + toroidal transformer technology

12 Volt	24 Volt	48 Volt
250 VA	250 VA	250VA
375 VA	375 VA	375 VA
500 VA	500 VA	500 VA

Phoenix Inverters VE.Direct

- Low and high battery voltage alarm trip and reset levels
- Low and high battery voltage cut-off and restart levels
- Fixed or dynamic (load dependent) low voltage cut-off
- Output voltage 220 / 230 / 240 V
- Frequency 50 Hz or 60 Hz
- ECO mode on/off and ECO mode sense level

VE.Direct Accessories

- Victron Connect App or software
- VE.Direct Bluetooth Smart dongle
- VE direct to USB interface
- VE.Direct cable (0.3 - 10 meter)
- VE.Direct cable right angle connector (0.3 - 10 meter)

To be released: VE.Bus Bluetooth dongle

- Change settings, monitoring, and software updates via Bluetooth
- Measures battery voltage and temperature: eliminates the need for voltage sense wires and temperature sensor
- Wireless communication with other Bluetooth enabled devices: MPPTs, Color Control, Battery Monitor
