

Orion-Tr Isolated DC-DC Charger remote cable

In the Orion-Tr Isolated DC-DC Chargers the remote on/off circuit is referenced to the primary battery (e.g. starter battery). The Orion-Tr Isolated DC-DC Charger remote cable is intended for applications where the remote on/off signal is referenced to the secondary battery (e.g. lithium battery with BMS).

Specifications:

Maximum input voltage: 35 V

Maximum output voltage: 70 V

Minimum input voltage needed for pull down: approximately 4 V

Maximum pull down current: approximately 30 mA (short circuit proof)
